Professional Summary

A strong coding foundation combined with experience developing Android and React applications. Python, Java, and Javascript are the programming languages I enjoy using and I am most proficient in. Furthermore, I have worked on other languages such as C and C#.

Summary Of Qualifications

React and Python are two of my strongest skills as a junior developer. On my professional profile, I also have experience as an Android Developer. Throughout my software engineering journey, I believe my ability to solve problems across many broad areas has been the most valuable skill I developed.

Show-Case Projects

Recallcards
Build this project from A - Z, a flashcard app that lets you save and review your flashcards. A Python backend, a Redis database, and a React frontend
Skills: React, Flask, NGINX and Docker

NBack Game In Android
Using Java, built an Android version of the famous NBack game. The project repository exists in my GitHub.
Skills: Android Development · Java · Git

Work Experience

React Developer - Rasmio
Jul 2020 - Sep 2022, Tehran, Iran

My responsibility as a front-end developer was to build the site's web pages with React. I also used Axios, Redux, Figma, and Sass, along with React
Skills: Docker · Git · React.js · HTML · Cascading Style Sheets (CSS) · Bootstrap · JavaScript · SASS

Android Developer - MagiaVas
May 2017 - May 2018, Tehran, Iran

During my time at the company, I developed the Paygear Android application, an app that facilitates money transfers between users. It was written in Java and I worked on activities, fragments, JSON data retrieval from the rest API, binding it dynamically to the recycler view, etc.
Skills: Android Studio · Kotlin · Android · Git · Java

Education

Masters of Informatics - TU Kaiserslautern
2022 - Present, KL, Germany

Bachelor of Software Engineering - IAUNTB
2017-2020, Tehran, Iran
